Julian Hernandez Tenorio

Mexico City, Mexico | julian_hernandez845@proton.me | linkedin.com/in/julian-ht

Professional Summary

Senior Software Engineer with 15 years of experience building and maintaining business-critical enterprise web applications for international clients. Expertise in **C#, .NET Core, REST APIs, and SQL Server**, with a proven track record of bridging the gap between complex business operational needs and scalable technical execution. Specializes in production troubleshooting and legacy system modernization to ensure high availability and reliability.

Why I am a Strong Fit for the Business Systems Analyst Role

Technical Specifications & Systems Configuration: 15 years of experience translating ambiguous operational processes into clear technical workflows. In previous roles, I reduced operational waste by up to 25% by redesigning inventory and operations systems through precise T-SQL logic and application workflows.

API Integrations & iPaaS: Extensive experience designing and maintaining RESTful services and service integrations. Proficient in managing the full lifecycle of API contracts and data exchange (XML/JSON) to connect disparate enterprise systems.

Enterprise Experience: Proven ability to deliver maintainable software in business-critical environments (Healthcare, Manufacturing, Finance), ensuring secure handling of permissions and high-performance data processing.

Core Technical Skills

- **Languages/Frameworks:** C# (15y), .NET Core, ASP.NET MVC, Blazor, JavaScript, HTML5, CSS3.
- **Data:** SQL Server (15y), T-SQL, Stored Procedures, Relational Database Design, Query Optimization.

- **Architecture:** REST APIs, Service-Oriented Architecture (SOA), Dependency Injection, Async Patterns.
- **Operations:** Production Support, Root Cause Analysis, Git, Azure DevOps, Agile/Scrum.
